DATUK RICHARD FONG

*Dato' FD Mansor
Group Executive Chairman / Chief Executive Officer*

I AM VERY PROUD OF ALL OF THESE ACHIEVEMENTS AND I WOULD LIKE TO THANK EVERYONE AT GLOMAC FOR THEIR HARD WORK AND CONTRIBUTION.

It's hard to believe that we are already into the last quarter of 2006, even the country's Budget 2007 is out and it is a good one.

Several proposals such as fiscal incentives, new economic zones, greater infrastructure development and increasing low-cost housing will certainly help the property market and construction sector.

But before we get ahead of ourselves, let us remind ourselves of some of the high points of 2006.

Bukit Saujana, the exclusive residential enclave of Bandar Saujana Utama has been launched, and so has S.U. Mall, the new focal point for leisure and commercial activity in the township. Also, there are the Regal Homes (Phase 2B), a design which is back by popular demand.

Then there is Suria Residen, Cheras, another exclusive low density, gated and guarded residential development, just 20 minutes away from the Kuala Lumpur city centre.

We also have Glomac's first themed development - Saujana Rawang. This unique development draws its inspiration from the beauty and charm of the Balinese garden. You can read about this and more inside this edition of our newsletter.

In other developments, Glomac is expanding its interest overseas. Our Australian subsidiary has bought an office building in Australia to boost the Group's future earnings beyond Malaysia. We are also looking at other overseas market such as India and Vietnam.

And last, but not least, in May, our Group Managing Director, Dato' FD Iskandar was elected Chairman of the Real Estate and Housing Developers' Association (REHDA), Selangor Branch.

Then in August, our Group Executive Vice-Chairman, Datuk Richard Fong was elected President of the International Real Estate Federation (FIABCI), Malaysian chapter, a prominent voice of the country's real estate industry.

I am very proud of all these achievements and I would like to thank everyone at Glomac for their hard work and contribution. Glomac's role as one of the country's leading property developers is not only beyond doubt. It has been acknowledged and recognised!

SURIA RESIDEN

IS IT A SEMI-D OR BUNGALOW?

Luxury in concept and design: the innovative Semi-D Bungalows.

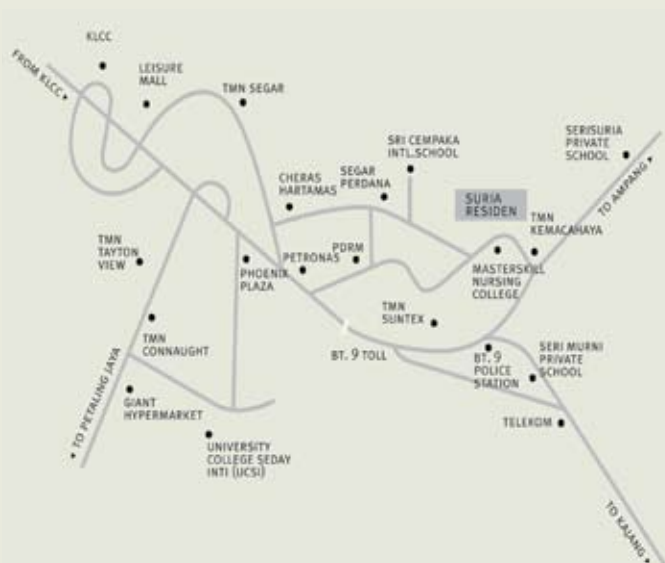

The answer is both! As a matter of fact, it's more Bungalow than Semi-D. The design has all the quality, feel and look of a bungalow and is a Semi-D only through the discrete wall at the ground level which adjoins the neighbouring home. This unique design concept is what we have lovingly termed the 'Semi-D Bungalow'.

The spacious semi-detached houses are seamlessly connected to the gardens through the outdoor lanai, patios and balconies, bringing in the fresh air which sweeps through the entire house.

Each semi-detached house comes with 5 spacious rooms which are fully equipped with ensuite bathrooms and 1 maid's room. The room at the loft with multi purpose functions can be converted into a home theatre, study or music room.

There will be 56 Semi-D Bungalow units and 2 Bungalow units (2 1/2 Storey) available with a minimum and maximum build-up area which ranges from 3,359 sq ft to 3,404 sq ft. Best of all, it comes with an attractive price of only RM773,800 and onwards. It is truly an excellent offer not to be missed! Expected completion date is the 2nd quarter of 2008.

Suria Residen is strategically located in the matured Cheras area with easy accessibility via the Grand Saga Expressway and the East-West Link Highway. It is a mere 20 minutes away from the Kuala Lumpur city centre.

Q: HOW IS THE ENVIRONMENT LIKE IN BANDAR SAUJANA UTAMA?

A: The people here are generally friendly and it is a harmonious community which is growing larger every day.

Q: HOW IS YOUR BUSINESS DOING?

GLOMAC VENTURES DOWN
UNDER AND ABROAD!

Glomac's Australian subsidiary bought an office building in Australia to boost the Group's future earnings beyond Malaysia. This marks our first foray into the overseas market. The building includes a 7 split-level carpark with 445 bays and 5130sqm of office and 324sqm of retail space. Glomac paid AUD30.5 million for 380 Lonsdale St. We believe the property has great long-term investment potential as the commercial market in Australia is about to enter into a period of growth.

Glomac also intends to expand its operations beyond Australia to include other countries too. It is currently looking at a few pieces of land in major cities in India and planning to develop them into either commercial or residential properties together with local partners. Vietnam is another country where Glomac is seriously exploring opportunities. This is all part of Glomac's growth plan as well as to counter any softness in market at home.
